

Caring as One

Reach Your Fullest Potential Faster

After a major surgery or serious illness, you're understandably eager to get back to the things you enjoy. At Affinity Medical Center's Inpatient Rehabilitation Unit, we help you get there faster.

Using proven techniques and the latest equipment, our caring team of rehab specialists will guide you through a personalized, thorough treatment plan designed to get you back to your friends, family and hobbies as quickly as possible.

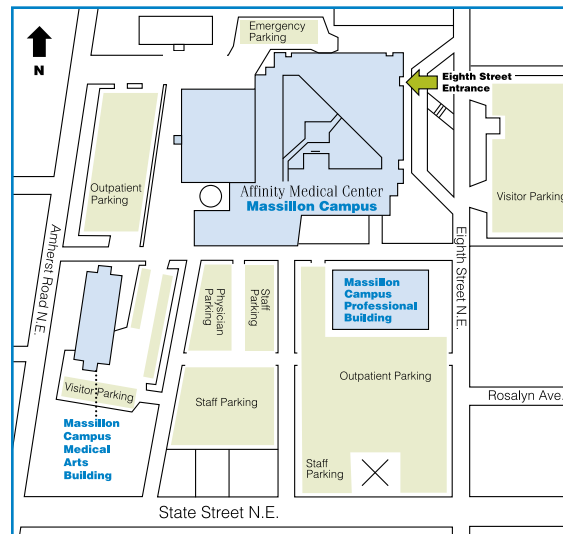

In fact, recent statistics show that when you take advantage of our facility, you get to go home sooner and with a higher level of functionality than national and regional averages.

A Continuance of Care

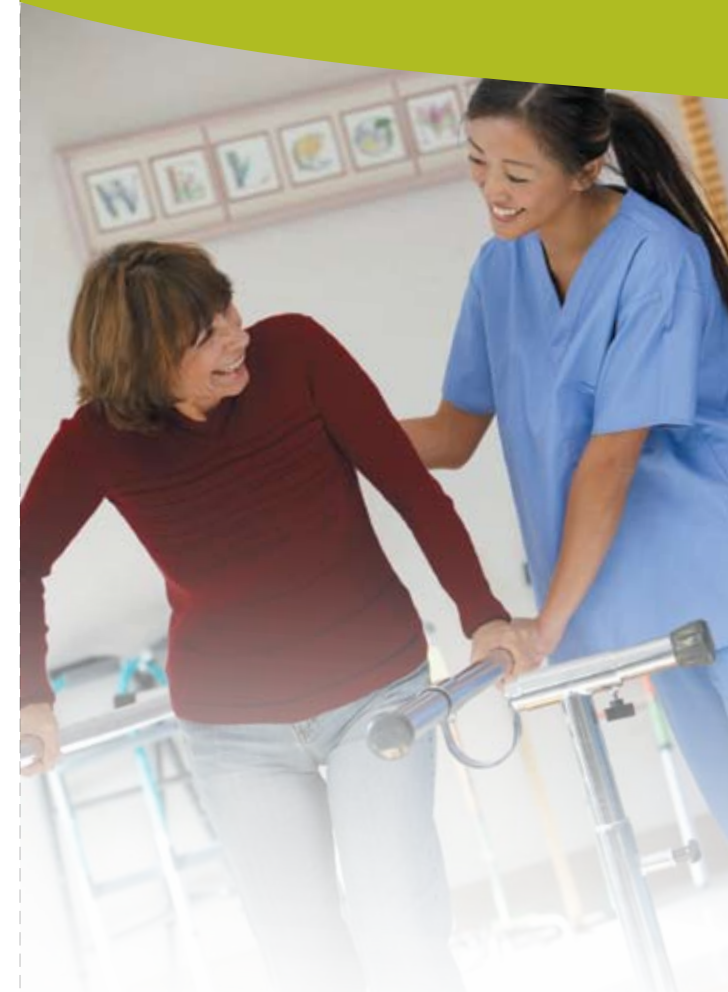

If you require outpatient therapy services after you are discharged from the Inpatient Rehabilitation Unit, the caring staff at our Outpatient Therapy Services Department will be happy to assist.

For more information on how they can help, please call **330-837-6893**.

Excellence in Rehabilitation

Affinity's Inpatient Rehabilitation Unit was the first hospital-based program in Stark County to be endorsed by the Commission on Accreditation of Rehabilitation Facilities (CARF). This three-year accreditation is the highest level that can be awarded to a rehab facility and reflects steadfast dedication to the high standards established by CARF.

Meet Our Team

Our interdisciplinary rehabilitation team consists of a physiatrist (a physician specializing in rehabilitation), physical therapist, occupational therapist, speech and

language pathologist, recreational therapist, social worker, dietitian, and rehab nursing staff.

Working together, they'll create an individualized treatment plan specially designed to target the areas you need most. This comprehensive approach to rehabilitation helps to ensure a more efficient recovery process. When you're finished with your plan, we'll work with you to arrange a smooth transition back into your daily life.
