Need Relief from Pain?

Aching. Burning. Numbness. Pressure. Pins and needles. There are many words people use to describe pain. But they often note one commonality: it drastically affects their quality of life. Suffer no more. Get relief at Affinity's Pain Management Center.

How we can help

Patients at our specialized outpatient center are cared for by certified nurses and credentialed physicians—anesthesiologists with specialized training in pain management. They will thoroughly review your records and conduct extensive physical evaluations to diagnose the source of your pain. Numerous

diagnostic studies are also available at the Hospital to help pinpoint the problem. Our experts will develop a personal treatment plan to relieve your pain and improve the quality of your life.

Get to know the director

The Director of Pain Management, Dr. Jamesetta H. Lewis, D.O., specialized in anesthesiology and pain management prior to joining Affinity Medical Center. She received her Bachelor of Arts degree in Radiation Therapy from National-Louis University in Evanston, Illinois and her Doctor of Osteopathic Medicine from the Ohio University College of Osteopathic Medicine in Athens, Ohio. Her impressive educational background consists of an internal medicine internship in addition to both an Anesthesiology Residency Program and a Pain Management Fellowship.

We offer a wide array of treatments and procedures

Depending on your needs, your treatment plan may include:

- Medication management
- Nerve blocks and injections
- Osteopathic Manual Medicine (OMM)
- Electric stimulation therapy
- Physical and occupational therapies
- Surgical referrals
- Biofeedback – psychotherapy
- Radio frequency ablation
- Neurostimulation
- Intrathecal drug delivery system
